

SIZE
175x93x55 mm

CL24

Universal board for lift supervision via VEGA cloud.

MAIN FEATURES

- 24 programmable inputs.
- 4 relays outputs.
- 4 open collector output.
- RJ45 Terminal for the connection to COMBI GSM for VEGA cloud connection.
- RS485 Serial interface for the connection to GSM106 for VEGA cloud connection (GSM106 can be connected to a dialer at the same time).

TECHNICAL DATA

Power supply: 10 to 18 Vdc.

Max current requested: 1A.

Inputs: 24 opto-isolated inputs, 5 to 50V 50mA.

Output: 4x 1A relays and 4x open collector.
